Dit is een handleiding voor het aanpassen van de rechten op je Mac zodat Mica Support mee kan kijken.

Ga naar [Mica.nl > ondersteuning](https://mica.nl/ondersteuning) en download Teamviewer.

The screenshot shows the Mica IT website's support page. The navigation bar includes 'HOME', 'IT SERVICES', 'IP NETWORKS', 'IT SOFTWARE', 'OVER MICA', 'CONTACT', and 'ONDERSTEUNING'. The main heading is 'Ondersteuning' with a '← BACK' link. Below the heading, it states 'Mica staat voor u klaar. 24 uur per dag, 7 dagen per week'. A red arrow points from this text to two download options for TeamViewer: 'Windows systemen' and 'Apple systemen'.

Open Teamviewer vanuit de downloads.

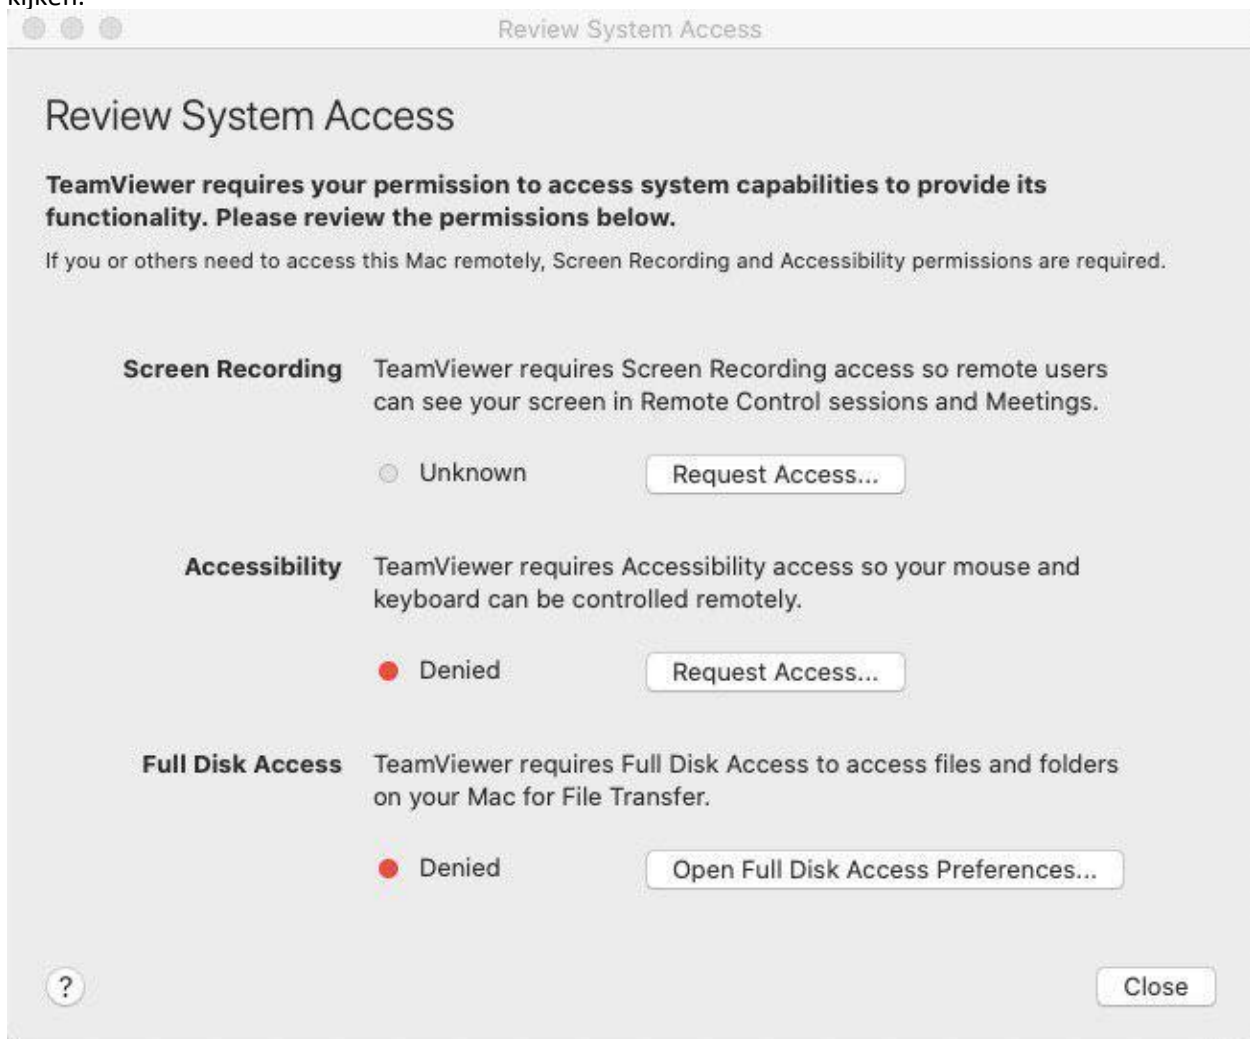

The screenshot shows a Mac's dock and a context menu. The dock contains icons for Photos, a folder, and the Trash. The context menu is open over the folder icon, showing 'Open in Finder' and 'TeamViewerQS' with a double-headed arrow icon.

Klik op *Open*

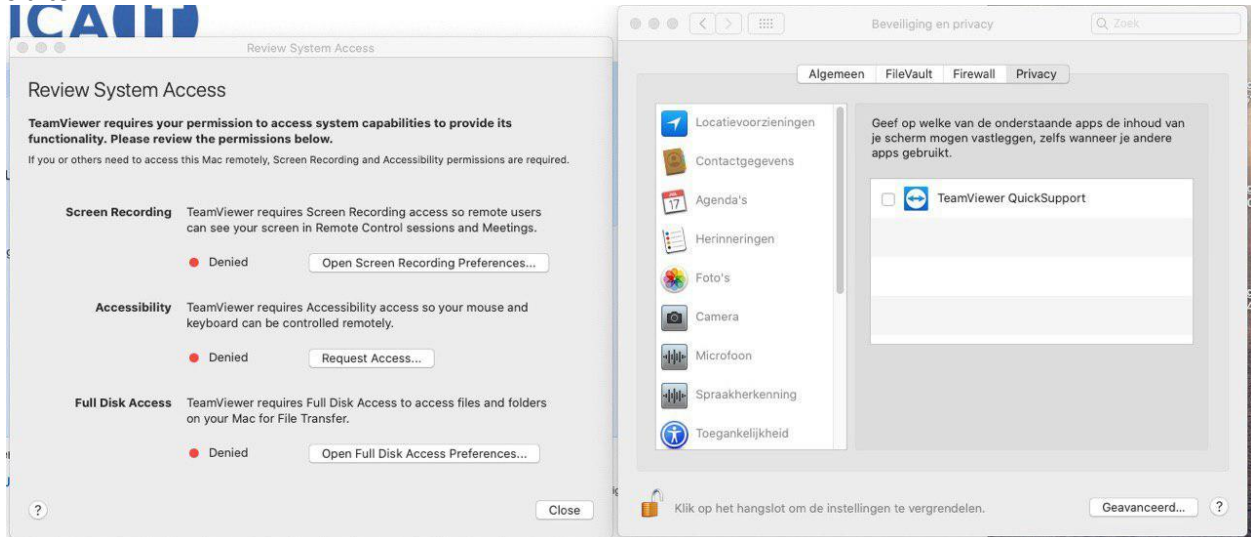

Nu moet Teamviewer toegang krijgen zodat Mica Support mee kan kijken.

Klik op *Request Access* of *Open Screen Recording Preferences*.

De instellingen zullen dan openen.

Vink *TeamViewer QuickSupport* aan, je zal vervolgens de vraag krijgen om TeamViewer af te sluiten

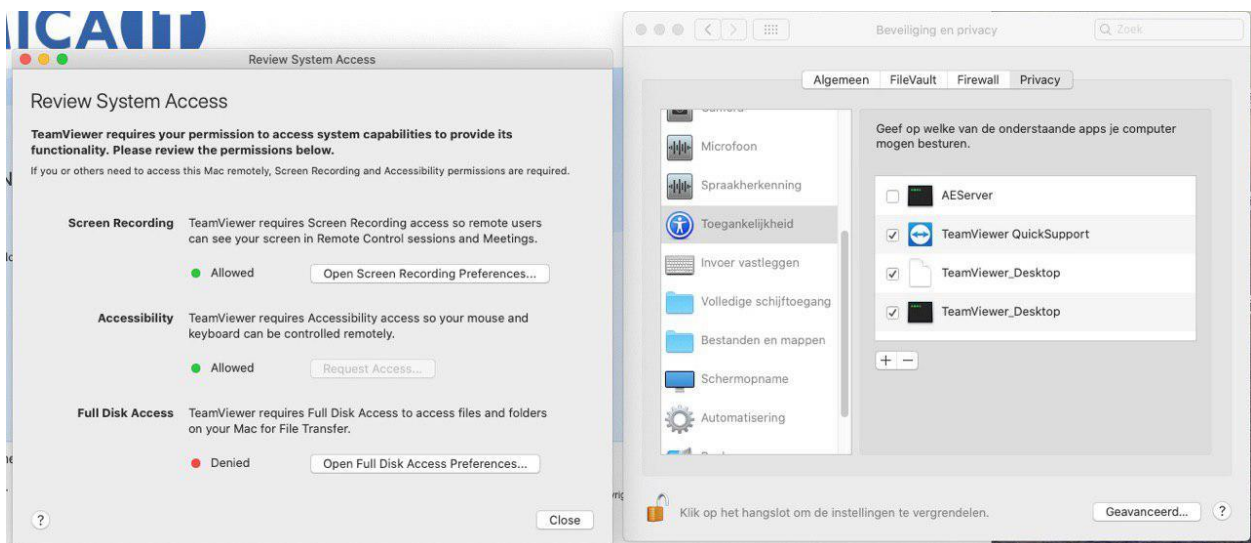

Start TeamViewer opnieuw op.

Klik op de 2^e *Request Access*.

De instellingen zullen weer openen.

Vink hier alles van TeamViewer aan.

Teamviewer is nu gereed en Mica Support kan nu ondersteuning verlenen.
